The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, there is no clear antecedent basis for "the dried powder". It is also indefinite as to whether the powder would necessarily be the polyphosphate. In claims 2 and 6, "such as" renders the scope of the claims vague and indefinite. In claim 10, it is indefinite as to whether the Mo:P molar ratio is required to be varied between 1:5 and 1:30, since the claim recites that the ratio "may be" varied. In claim 17, it is indefinite as to whether the temperature may be as low as 200 C, since claim 1 has a lower temperature limit of 250C. In claim 19, "selected from...and" is improper Markush terminology. It is also indefinite as to whether the heating is required to be carried out at 250-350C.

Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no "description support" in the original

specification for a molybdenum fertilizer comprising "at least one percent by weight" of molybdenum, and phosphorus in a molar ratio of Mo:P "of at least 1:5".

Claim 17 is objected to under 37 CFR 1.75 ( c ) in failing to further limit claim 1.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
